WasteZero: Programs With Real Impact

Typical WasteZero Bag-Based PAYT Results

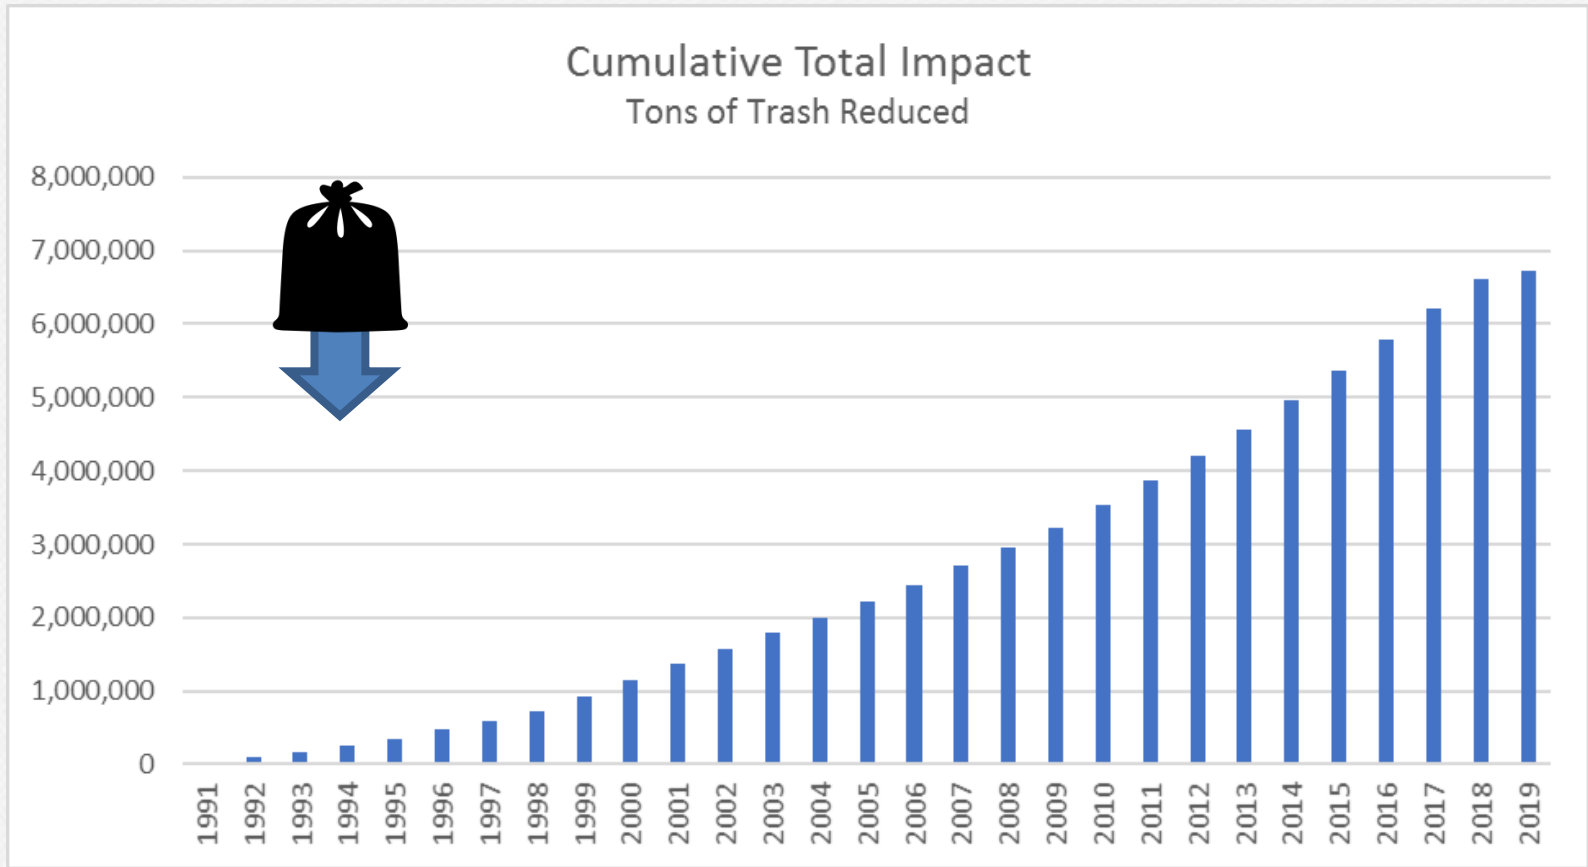

WasteZero's bag-based PAYT programs enable communities to generate and dispose of much lower municipal solid waste (MSW) per capita than average US communities.

Many WasteZero PAYT Program customers lower their per capita MSW to less than half of the national average, while simultaneously reducing the communities' costs for handling residential waste.

WasteZero Programs: Keeping Trash Out of Landfills

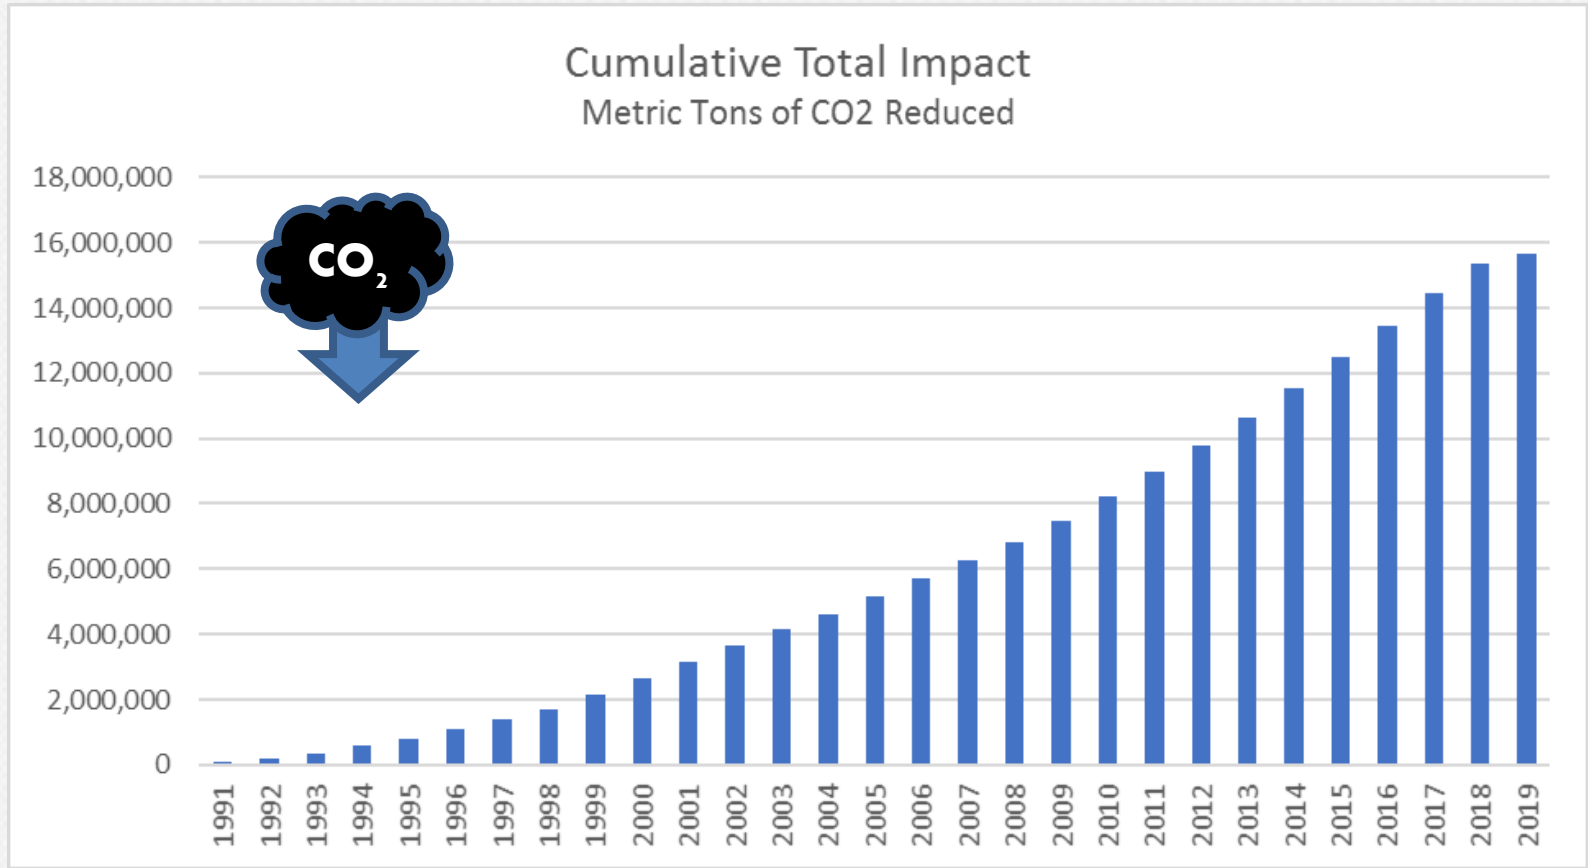

Since 1991, WasteZero programs have reduced trash by over 6.7 million tons.

At our current rate, we reduce trash by approximately 400,000 tons each year... generating a growing cumulative impact!

WasteZero Programs: Green House Gas Reduction at Scale

Since 1991, WasteZero programs have reduced GHGs by more than 15.6 million metric tons, equivalent to removing approximately 2.5 million cars from the roads.

At our current rate, we reduce GHGs by approximately 750,000 tons per year... generating a growing cumulative impact!!
